STAND FIRM,
Selling Motors. The Coal Vendor is Cutting a Very Big Figure in the Matter.

TOLEDO, O., May 22.—President McFadden received a telegram Monday morning from J. E. Charlson, president of the Iowa miners' organization, saying, "Everything is in good shape in this state, and we have complete control."

President McFadden says he has waived all order that no coal shall be imported, for any price, while the strike lasts, in two cases. The superintendent of the Illinois human asylum, at Jacksonville, telegraphed him that a thousand helpless inmates were suffering from lack of fuel, and said that the company that furnished the coal would agree to import only what was needed by the asylum. If allowed to import, this request was promptly granted on the conditions proposed. The other case was in southern Ohio, where a mine was open.

The operators of the mine had agreed to let them import coal, but they had only one carload of coal left to burn their furnaces. The pumps stopped the mine would be closed. The miners did not charge the miners had set fire to the mine, but President McFadden issued an order permitting coal to be mined to run the pumps. Spreading of the railroads employed meeting Sunday night addressed by him. President McFadden said a new era was beginning in the lumber union world. Their complete independence was coming to be recognized by the members, and with it the old jealousies between nations of different crafts was disappearing. He referred to the enthusiastic reception given him last week when he addressed the Association of Iron Workers in Cleveland, and by the railroad men.

The time is quicker coming," said he, "when if any class of workers is sent to the hospital for fair treatment, not in a battle but will be pulled or whacked by men labor will be run down.

Two more lives were saved Sunday from the merciless storm-tossed lake by the brave crew of the lifeboat situated at the mouth of the river. It seems almost a miracle, but it is true nevertheless, that Steve Myers, aged eighteen, and John Gelsner, aged fourteen, the rescued youths, had been from the north pier, off Illinois street, since last Thursday morning without food and exposed to the waves and wind just before the great gale came upon them.

Carlisle Mercury: A few days ago, a particular friend of ours from the same county said: "Gen. Buckner will not be a candidate. He is now seventy-one years old, and realizes that the time has come when he can not engage in active politics. Besides, Mrs. Buckner is opposed to his entering the contest, and he prefers to enjoy the remainder of his days in the peace and quiet of his country home."

There is a prospect that the State bank issue, which has been gathering strength at caucuses and conferences ever since Congress assembled, may be fought to a finish in the House this week. The advocates of State banks have been too far weeks to test their strength, they failed to get a bill reported in the Banking Committee, and so it was called off. The issue is still on, and the House

CLEARLY DEFINED.

A PEEP IN O HISTORY.

Extract From Mill's Great Speech.

The tariff speech delivered in the Senate recently by Roger Q. Mills was a great one—so good that it is worth a place in the limited space of every country newspaper, and the careful study of every citizen of the United States. Below is a portion of the report of the speech as published by the Courier-Journal:

"Mr. Mills addressed himself mainly to the tariff as it affects the farmer, and especially the wheat grower. He took hold of that Reed-Lodge speech, for they are one, with the grip of a giant, and rended it into thousand tatters. The new tariff fight of the Reed-Lodge school declare that our sun plus wheat of 250,000,000 bushels per annum is to be consumed by the importation of non-agricultural classes from Europe, who, going into our shops and receiving American wages, will thus have money enough to buy the wheat of the American farmer. Mills showed that to consume the present sun plus would require the importation of 54,000,000 people the first whack. As we now have less than 70,000,000 population, that would make a good deal of material for the new Know-Nothing party which is only a republican side-show to work on. Mr. Mills showed that it would require all the armed and mercantile vessels afloat on all the waters of the seas to transport 54,000,000 people to our shores in one year. Then he continued:

"But that does not make any difference. It is a beautiful thing, and ought not to be marred by any such commonplace considerations. I suppose our friends were going to let the immigrants provide the vessels for themselves. But, 54,000,000 people have to come here, according to that prophecy, and they have got to come in one year, and they have got to come in time to consume that crop of wheat, and they have got to come with money enough to pay for it, or it will do the farmers no good. What will they do, Mr. President, when they come here to make the money to buy the wheat from the farmer? I will not do to bring agriculturists. The committee was too sharp for that. They said that they must be 'non-agriculturists,' that they must be miners, manufacturers, persons engaged in transportation, laborers, mechanics and others."

"Now, of the non-agricultural population of the United States one-third are manufacturing laborers. Let us assume that one-third of these will be 18,000,000, who have to come and be supported by manufacturing labor. That includes men, women and children.

"Again, by the same division of our population, one-third of that number are laborers actively engaged in the shops. That makes 6,000,000 laborers who have to come here in one year. Six million of manufacturing laborers have to be brought by the McKinley law to this country. Very well. What will they do? They will go into manufacturing, of course. How much will they make? If 4,250,000 operatives of ours made \$9,270,000, 600 worth of manufactured products in 1890, how much will 6,000,000 make? It is a mere sum in arithmetic that an ordinary Republican ought to be able to cipher out. Somebody else will cipher it out if they do not. They will turn out, if they work as well as our people, \$13,000,000 worth of products. We consume \$150 per head of our manufactured products. It will be fair to assume that that product is \$8,000,000,000 worth. That would leave \$5,000,000,000. What is to be done with it?"

The above is a sample brief from this powerful speech, a speech which, if read and studied by every wheat-grower in the United States, would settle the tariff question for good and all, and settle it right. Then he goes on to show that according to the Republican doctrine the \$5,000,000,000 (five billion) worth of surplus manufacturing products must be consumed at home, and there would be a most delightful kettle of fish. The Democrat, however, he would be to export the goods; the Republican policy is to import the people to consume them, and if that policy were fully carried out—to import people to consume our surplus breadstuffs and provisions and manufacture our raw materials, including cotton, in a few years Europe would be depopulated and then it would only be a question of time before we would have all Asia here."

In regard to Gen. Buckner and his alleged candidacy for the United States Senate, a particular friend of ours from the same county said: "Gen. Buckner will not be a candidate. He is now seventy-one years old, and realizes that the time has come when he can not engage in active politics. Besides, Mrs. Buckner is opposed to his entering the contest, and he prefers to enjoy the remainder of his days in the peace and quiet of his country home."

Democratic Pensions.

Thos. Pigg, of this place, has recommended an increase of pension and back pay amounting to more than \$500. This was done by the Democratic administration, too, the "enemy" of the pensioners. How remarkable!

And there have been at least a dozen Eastern Kentucky cases settled in a similar manner within the past week. The pensioners who read the daily papers can not be fooled by the Republican talk of Democratic hostility to pensioners.

The long reports published every day show the falsity of such reports.

The politicians who denounce the reports know they are wholly untrue and only do it to hold or sway the pensioner vote. Unfortunately the great mass of pensioners do not have access to reports of what the Democrats are doing in pension matters.

A New Collector.

C. W. Ford, of Catlettsburg, deputy revenue collector for this district, appointed by Collector Shely a few months ago, has resigned.

It is reported that James Smith of Ashland, has been appointed to fill the vacancy.

John Elce has been umpiring in baseball games between Louisville and Frankfort. John writes that he has succeeded in galvanizing the will of both clubs. This speaks well for his work. When an umpire has only one of the clubs and him it is accused of partiality, but no such charge can be made when both of them like.

A bill has been passed by the lower House of Congress appropriating \$150,000 to reimburse Hon. John M. Rice, of this place, for costs paid by him in fighting a contest for his seat in Congress several years ago. It must be sanctioned by the Senate before becoming a law. It is customary for Congress to pay such claims and the tardiness in this case should be an argument for putting the bill through at once, now that it is before them.

Miss Charlie Berry, of Ashland, and Mr. B. F. Webb, of Webville, this country, were married in Ashland yesterday, at the residence of Mr. A. G. Terry. Miss Berry is well and favorably known here, having taught several schools in this country. Mr. Webb is a merchant, and one of this county's most successful business men. After a ten days' wedding tour they will take up their residence at Webville.

An occasional bottle of Ayer's Sarsaparilla does more to correct the tendency of the blood to accumulate humors, and keep the organs sound and healthy, than any other treatment we know of. "Prevention is better than cure." Try it this month.

A Summer Snow.

A majority of the days of last week were as warm as most of us would suffer without protest in July or August, the thermometer registering up in the altitudes. But on Saturday a change came which brought snow Sunday morning. It was not heavy enough at this place to show on the ground, but at Blaine there is reported to have been about three inches, and over in West Virginia two inches. Sun as low as the 20th of May is a very unusual occurrence. No serious damage was done to vegetation.

Gen. Wat Hardin.

Gen. Wat Hardin dropped in on Louisa rather unexpectedly last Monday. As is well known he is a candidate for the Democratic nomination for Governor. It was County Court day, and as there were a good many people in town then, Hardin consented to make a speech. The court very courteously gave way to him and a good-sized crowd assembled to hear him. After a brief reference to his candidacy he proceeded to make a clear and eloquent Democratic speech, which it is well known that he is able to do. He was listened to with the deepest interest and was heartily applauded. The falcons of the "protectionists" idea were plainly shown by simple illustrations and facts which clearly brought the tariff home to his listeners. Gen. Hardin will speak in every county in the state before the campaign closes.

Miss Jack Carey.

A gold mine in Lawrence county would "come mighty handy" just about this time, but we are afraid to investigate the following report for fear the whole world would disappear as a myth. It was a telegram sent to the Courier Journal from Catlettsburg:

"P. W. Willey, a farmer residing in Lawrence county, while plowing on his farm short ago discovered an ore with the resemblance of gold and silver. He sent the ore to Atlanta to be assayed. The report of the assay shows that the mine is very rich, the gold being estimated at \$300 per ton, while there is found in the same vein silver in paying quantities. A stock company will soon be formed to develop the mine."

Gunnell's Gifts.

Mr. G. W. Gunnell has announced a novel plan of distributing some useful and valuable articles among his customers. He has one present for them every week and every customer who buys as much as fifty cents worth in any article entitled to a ticket. This ticket bears a number and has a coupon with the same number. The holder drops the coupon through the slot in a sealed box and retains the ticket. On Saturday the box is well shaken and a coupon drawn out. The holder of the ticket bearing the corresponding number gets the present offered. Last Saturday J. A. Shannon was the successful one and was given a \$5.00 pair of shoes. A silk umbrella will be handed out to-morrow, and something of about those values will follow regularly.

ABSOLUTELY PURE

IMPORTANT

To Democratic Candidates.

All candidates who desire to enter the Democratic primary election to be held on June 16th must send in to the Chairman their names and the amount assessed to defray the expenses of the primary. This must be done on or before Friday June 1st, in order to comply with the law and to have their names printed on the ballots. This applies to the offices of magistrate and constable as well as to all county offices.

Assessments have been made in proportion to the value of the office, and if the amount paid in should exceed the cost of the primary the balance will be returned to the candidates, pro rata. The list of assessments may be seen by applying to the Chairman.

WAYNE'S FIRST CIRCUS.

Not Lacking in the Usual Particulars.

A lawn just used to enclose before it can have them in peace. John Robinson's circus was at Wayne W. Va., Tuesday and the usual general row was on hand. A dispatch to the Post says:

"It was the first circus in the town and thousands of people flocked there. Old feeds were revived, and a crowd of 20 men paraded in one of the worst lights that ever was seen. After the authorities had stopped the contests, the following were found to be injured, and some of them are in a serious condition; William Napier, cut in the back; Curt Napier, shot in the back of the neck; Mose Napier, stabbed in the breast; A. Adkins, struck in the head with a club, and is suffering from concussion, and is suffering from a club and otherwise badly hurt. Ten others who were in the ring are more or less disfigured. No arrests were made."

Floyd County.

Calvin H. Scott, Postmaster at Ogle Hill, Carter county, was killed by his son James last Tuesday. The father was drunk and quarreled with his son and had a revolver in his hand at the time he was shot. He was 55 years old, leaves a wife and nine children and was once a man of wealth. He had killed a man seven years ago.

The May term of the Magistrate Circuit is a very busy one. Over 700 cases were on the docket, and many were disposed of. The grand jury returned 105 indictments. Five of them, against Leek Cole, Peter Williams, George Howard, It, Montgomery and Little Gullett were for murder. The first four were bound over in sum of \$
